

Instruction Level 1 Project Video

As part of your application for Biotech Booster Level 1, you need to submit a project video to introduce your team, project and how you are planning to create impact with your project. The project video must not be longer than 5 minutes, and the format can be a recording of yourself presenting a slide deck. Please note that we will not take into account the quality of the video, but please make sure that it is clearly audible.

Topics

To guide you, we are interested to learn more about the following topics in your video:

- **Project team:** (~ 1 min)
A short introduction of the project team members. Who are you, and what will be your role in the project?
- **Project description:** (~ 1 min)
Please give a short project description. What problem are you solving and what is your solution? This can be a general introduction; the goal is only to introduce your project. More detailed information needs to be shared in the application form.
- **Motivation:** (~ 2/3 min)
 - What is your goal with the project?
 - What do you want to achieve in the long-term?
 - How can Biotech Booster contribute to this goal?
 - Why are you applying for Biotech Booster level 1?

As mentioned, the video can be a recording of yourself presenting a slide deck. For inspiration, we have created an example slide deck (see “*Annex 1: Example project video slide deck*” below).

Submitting your video

Your project video must be submitted by emailing submissionportal@biotechbooster.nl. The file limit for the submission is 30 MB, so you should convert your project video to a lower resolution to keep the video file within the emailing limit. For more details on this, please follow the instructions “Biotech Booster Applicant Information”, which can be found on our [website](#).

Good luck, and we look forward to seeing your video!

Annex 1: Example project video slide deck
